

How to
add WCHTA to Metamask
and Swap on Pancakeswap

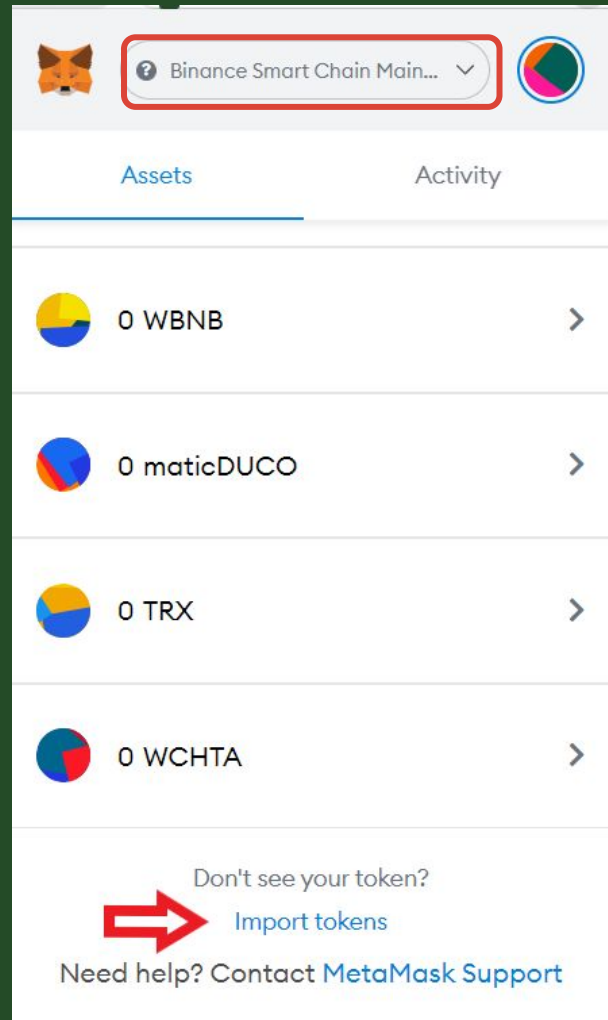

1. Make a new Account on Metamask
2. Install the Metamask Chrome Add-on

Open the Metamask Add-on in Chrome and Sign
in

Set to Binance Smart Mainnet

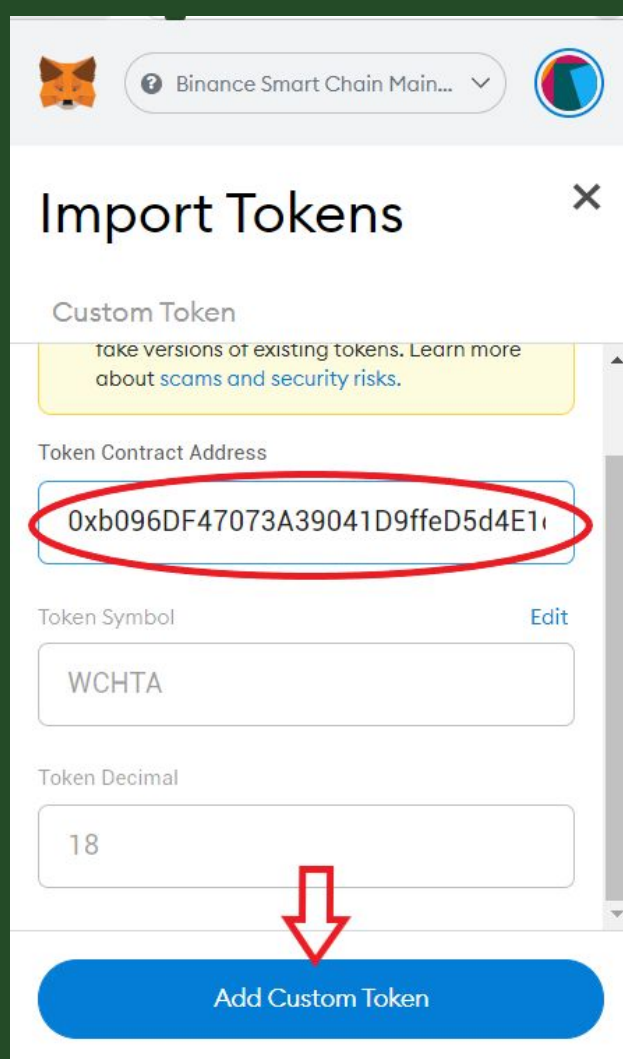

on the bottom of the tab
Assets choose
Import tokens

Paste the smart contract to
Token Contract Address
that can be found on
BSCscan

0xb096DF47073A39041D9
ffeD5d4E1d1b0D5D6b8E7

and Add Custom Token

Binance Smart Chain Mainnet

Import Tokens

Custom Token

Take versions of existing tokens. Learn more about [scams](#) and [security risks](#).

Token Contract Address

0xb096DF47073A39041D9ffeD5d4E1d1b0D5D6b8E7

Token Symbol Edit

WCHTA

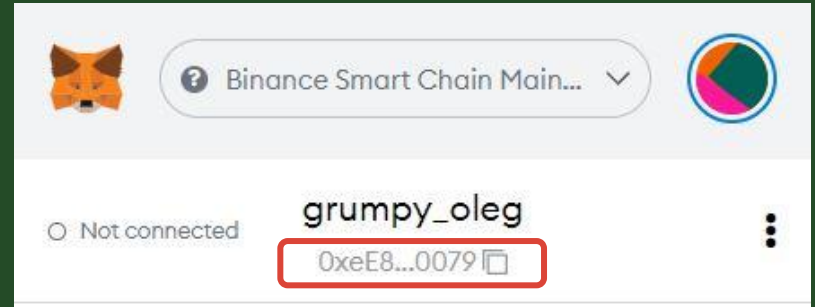

Token Decimal

18

Add Custom Token

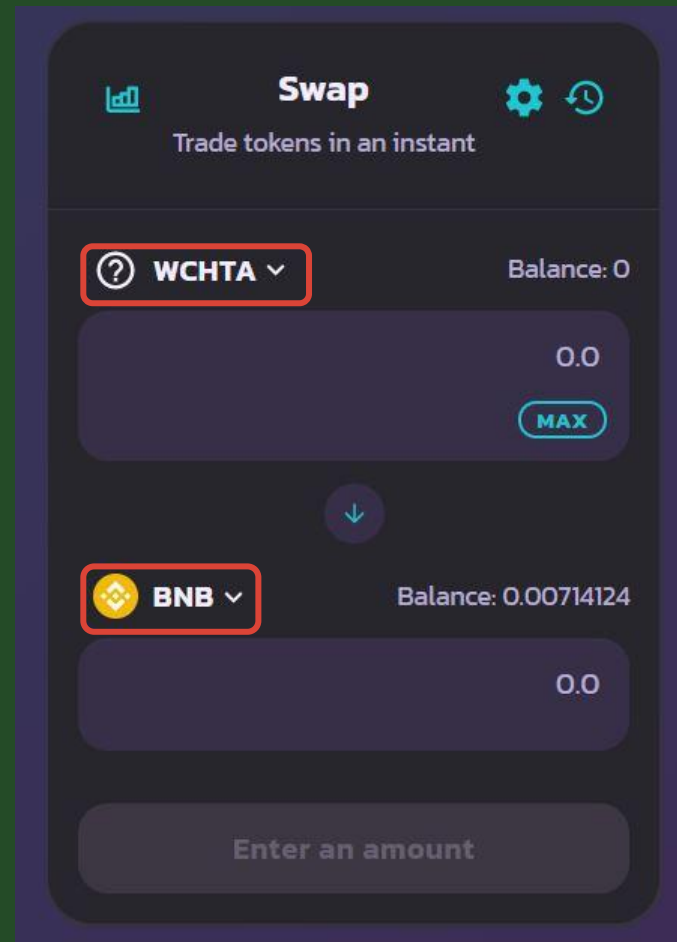

WCHTA is now added to
Metamask

Now you have a Wallet
Address where you can
receive the WCHTA to swap

Open Pancakeswap
choose WCHTA
if you not found WCHTA
paste the previous contract
address in the field

i swap only to BNB but feel
free to choose what you
want

Conclusion

Please note that you already need BNBs in your Metamask Wallet for the one time activation fee of the pair to swap.

For example WCHTA to BNB = 1 Activation

WCHTA to ADA = 1 Activation

The cost of the one time pair activation is ~0,12\$
after that you need to pay the normal gas fees for the swap.
